

# Practical Vocal Acoustics

## Contents

Foreword	xi
Preface	xiii
About the Author	xvi
<b>1 Introduction</b>	1
Tools	2
<b>2 Harmonics Primer</b>	3
Musical Tone	3
Voice Acoustics	3
Voice Source Harmonics	4
Voice Source Harmonic Characteristics	4
Mode of Phonation	5
Laryngeal Register	6
Intensity	7
Fundamental Frequency	7
Take-Away Message for Harmonics	7
<b>3 Overview of the Changing Theories of Vocal</b>	
<b>Resonance</b>	9
Resonance	9
Coupled Helmholtz Resonators	9
Linear Source-Filter Model 10	
Non-Linear Source-Filter Model 10	
<b>4 Formants Primer</b>	11
Vocal Tract	11
Formants	11
Number of Formants	12
The Roles Formants Play	12
Vowel Formants	12
Vowel Modification	13
The Roles of the First Formant	13
Depth or Fullness of Timbre	14
Openness-Closeness Dimension of Vowels	14
Harmonic Interactions with the First Formant	15
The Roles of the Second Formant	15

Vowel Clarity/Definition	15
Front-Back Dimension of Vowels	16
Second Formant Strategy for Male Upper Voice	16
Singer's Formant Cluster (SFC)	17
Relationship of the SFC to Vocal Fach	17
Relationship of the SFC to Resonance	
Balance and Interactivity	17
Sound Transfer Characteristics of the Vocal Tract	18
Locating Formants Relative to the Keyboard	18
<b>5 Harmonic/Formant Interactions</b>	<b>20</b>
Harmonic/First Formant Interactions	20
Timbral Opening and Closing	20
Open Timbre	21
Yell Coupling	21
Yell Characteristics	22
Close Timbre	23
Whoop Coupling	23
Whoop Characteristics	23
Yell and Whoop Frequency	24
Turning Over	25
The Pitch of Turning	26
From Turning to Whoop	27
Resonance Strategies between Turning and Whoop	27
Lowering F1 through Active Vowel Modification	28
Maintaining Vocal Tract Shape	28
Raising F1 through Vowel Opening	28
Second Formant Strategies	29
First Formant Tracking of H1 (F1/H1)	30
<b>6 Female/Treble Voice Resonance Strategies</b>	<b>32</b>
Middle Voice Challenge of Open Vowels	33
Upper Middle Voice	34
Whoop Timbre and Beyond	34
Examples of F1/H1 Tracking	35
<b>7 Male Passaggio Training</b>	<b>37</b>
Male <i>Passaggio</i> Objectives	37
A Stable Laryngeal Position and Tube Length, and a Convergent Resonator	37

## CONTENTS

Dynamic Laryngeal Registration	38
Familiarity with Vowel Turning	39
The Ability to Turn Over	40
Vowel Integrity with Appropriate Vowel Modification	40
Maintenance of Chiaroscuro Timbre	40
Vowel Modification Revisited	41
Non-Linear Source-Filter Theory Revisited	43
Resonator Convergence	44
Vocal Cover/Turning Over	45
Secondary Acoustic Registration Events	45
Summary of Acoustic Events Surrounding the Male <i>Zona di Passaggio</i>	47
Registration and Expression/Artistry	48
<b>8 Perceptions of Turning Over</b>	49
Perception of Vowel and Timbre	49
Perception of Tonal Sensation	50
Perception by Voice Type and Vowel	51
Difference in Effect Between Active and Passive Modification	51
Perception of Turning in a Deeper Voice	52
Effect of Approach by Leap	52
Darkened Timbre	54
Timbral Openings and Closings Other than F1/H2	56
<b>9 Pedagogic Implications of Tube Acoustics</b>	59
General Principles	59
Acoustic Strategies Across Range	60
<b>10 Pedagogic Strategies that Encourage Tube Stability and a Convergent Resonator</b>	62
Noiseless Inhalation	62
Monitoring Tube Length Stability	63
Efficiency of Articulation	64
Use of Affect to Position and Stabilize the Resonator	64
Tonal “Placement” Sensations	64
Second Formant “Placement” Sensations	65
<b>11 The Acoustics of Belting</b>	67
Yell Characteristics Reviewed	67

Belting: The Skillful Yell or Call	68
Muscular Factors in Belting	70
Vocal Fold Factors	70
Mix	70
Vocal Tract Factors	71
Breath Management Factors	71
<b>12 Semantic Differences</b>	73
Cover Terminology	73
Connecting Terms with Acoustic Strategies	74
Timbral Terminology: Close or Closed	75
Register Terminology	76
Vibrational Modes versus Head and Chest	76
Mix and Falsetto	78
Belting and Yelling	79
<b>13 Acoustic Explorations</b>	80
Exploring Vowel Turning	80
Beginning Explorations	81
Intermediate Explorations and Refinement	83
Exploring F1/H1 Tracking	85
<b>14 Corollary Strategies</b>	89
Dynamic Control	89
Pressure Reduction	89
Vibrancy and Flow	90
The Use of Affect	90
The Problem of Micromanagement	91
<b>15 Laryngeal Registration Revisited</b>	92
<b>16 Instructional Technology</b>	95
The <i>Madde</i> Voice Synthesizer	95
Limitations of <i>Madde</i>	96
<i>Madde</i> and Modes of Phonation	96
<i>Madde</i> and Non-Linearity	96
<i>Madde</i> and Vibrato	96
Spectrography	97
<i>VoceVista</i>	98

## CONTENTS

Power Spectra	99
Electroglottography	99
Studio Uses of <i>VoceVista</i>	101
<b>Definitions</b>	103
<b>Abbreviations</b>	115
<b>Appendix 1: Madde Explorations</b>	116
<b>Appendix 2: Approximate F1 Locations by Voice</b>	123
<b>Appendix 3: Events Surrounding the Male Passaggio</b>	125
<b>Appendix 4: DVD Contents</b>	126
<b>Appendix 5: Youtube Examples</b>	127
<b>Selected References</b>	129
<b>Index</b>	132
